

## Assignment for Intern: Creating a Presentation Deck and Prototype Applications

### Objective:

Transform the paper "The GenAI Maturity Model" into a comprehensive presentation deck. For each technique discussed, develop a small prototype application and include a GitHub link and a short demo video in the deck.

### Instructions:

1. **Read and Summarize the Paper:**
  - **Paper:** [The GenAI Maturity Model](#)
  - Summarize the content into clear sections and bullet points.
2. **Create the Presentation Deck:**
  - Structure the deck according to the summarized sections.
  - Ensure the deck follows the company format. Reach out to Yutha for the template and guidelines.
  - Use bullet points for clarity and conciseness.
3. **Develop Prototype Applications:**
  - Identify and create a small prototype application for each of the two dozen techniques discussed in the paper.
  - Host the code for each prototype on GitHub.
  - Record a short demo video for each prototype and embed these videos into the deck.
4. **Embed Links and Videos:**
  - Embed the GitHub links and demo videos for each prototype within the corresponding section of the deck.

### Expectations:

- **Accuracy:** Ensure the summaries and prototypes accurately reflect the techniques discussed in the paper.
- **Clarity:** The presentation should be clear, concise, and easy to understand.

### Resources:

- **Paper:** [The GenAI Maturity Model](#)
- **GitHub:** Ensure all prototype applications are hosted and accessible via GitHub.
- **Recording Tools:** Use appropriate tools to record and embed demo videos.
